

Aluminum Forgings

The newest addition to our family.

FRISA is proud to now offer Aluminum forgings in multiple alloys and applications.

Consistent with FRISA's other products, our as-forged or rough machined aluminum forgings comply with the highest standards of manufacturing.

MANUFACTURING CAPABILITIES

Weight	Up to 15,500 lbs (7 Tons)				
Size	Up to 150" (3,800 mm)				
Industries Served	Semiconductor, Electronics, Fabrications, Pumps, Medical, Others				
Grades*	6061	7075	7050	2219	2618
Condition of delivery	0	T4	T6	T651	T652
Value added services	Heat treatment, rough machining capabilities, in-house lab for destructive and nondestructive testing, engineering and PhD level metallurgical staff				

*Constantly adding grades to our scope of work. Grades can also be developed upon customer request.
